

Security Awareness Training for ages 5-17

Just like adults, children and young adults need the skills to identify and protect themselves from online threats. Inspired eLearning's new Security Awareness Training for ages 5-17 will equip minors with essential knowledge to navigate the digital world safely while encouraging responsible and informed online behavior.

Our training provides young learners with practical, everyday cybersecurity skills, boosting their confidence and sharpening their critical thinking. By empowering young learners to recognize and respond to online threats, our new course library not only protects them today but also instills responsible digital habits that will serve them for a lifetime.

Our engaging library of self-paced courses, games, and simulations will help users develop smart cybersecurity habits, empowering them to recognize risks and make safer choices online.

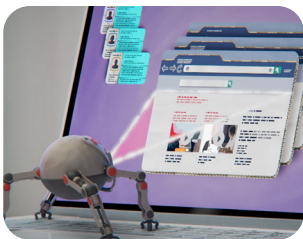

Our first offering will focus on high school students, with a course covering essential security awareness topics, including:

Key topics include:

- Phishing
- Malware
- Social Media
- Privacy & Security
- Mobile Devices
- Social Engineering
- Passwords

Additional security courses for elementary school and middle school students will be released throughout the year.

By teaching cybersecurity awareness from an early age to young adults, we're preparing students to become responsible, informed digital citizens who can safely navigate the complex and often risky online world.
